Technologies

Javascript 
C# 
Python 
SQL 
jQuery 

Projects

- Astro Pics**
A photo sharing app.
Github: <https://github.com/KevinSmhevin/astro-pics>
Live: <https://pacific-fjord-73675.herokuapp.com/>
An app that lets you post, view and share space related pictures. This app demonstrates the use of CRUD operations and was built using node, mongo and jQuery.
- Watch Games**
A game streaming app that uses Twitch.
Github: <https://github.com/KevinSmhevin/watch-games>
Live: <https://kevinsmhevin.github.io/watch-games/>
An app that lets you watch random live streamers on Twitch. Search by game and by popularity. This app demonstrates the use of REST API using Twitch.tv and Giantbomb.com's API. This app was built using jQuery.

Experience

- Automation Support Developer**
- IT Applications Engineering
June 2019 - Current
Tesla Motors
 - Design and develop automation solutions using robotic process automation for business processes.
 - Develop GraphQL resolvers, GraphQL queries and internal APIs to support business automations.
 - Consult with business stakeholders to provide functional and technical expertise for automation solutions, process improvements and risk identification/mitigation.
 - Served as a technical mentor for new hires and interns for the robotic process automation team.
- Associate Project Manager**
- Utility Relations
Nov 2016 - May 2019
Tesla Motors
 - Research new market launches and new utility processes. Create internal resources on new processes.
 - Manage residential solar programs, energy storage programs and electric utility relationships for more than 20 regional utilities across the east coast.
 - Work closely with operations, design, software, administrative and other internal teams to ensure we are meeting utility requirements and moving projects forward.
 - Lead regular meetings and conference calls to review projects internally and with the electric utility companies.
